## **DETAILED ACTION**

### ***Allowable Subject Matter***

1. Claims 1-4 and 8-19 are allowed.
2. The following is an examiner's statement of reasons for allowance: The prior art of record fails to teach disclose, or suggest, either alone or in combination the electronic package as claimed.

Upon further consideration, applicant's arguments with regard to the previous rejection of the claims as being obvious over Schueller et al. in view of Brandt et al. are persuasive. As noted by applicant, Schueller et al. does not teach using it's metal layers separated by a dielectric as a capacitor. Though two metal layers separated by a dielectric do define a capacitor, without the reference teaching the layers being used as such there would be no reason to tune the layers to optimize the capacitance of the layers. Thus, one of ordinary skill in the art would not look to Brandt et al. to teach tuning the capacitance of layers that are not used as a capacitor. Further, since Brandt et al. teach their embedded capacitor in a printed circuit board, not in a BGA package that is later affixed to a printed circuit board (as in Schueller et al.), it would not have been obvious to include the capacitor of Brandt et al. in the device of Schueller et al. For these reasons, the previous rejection is withdrawn and claims 1-4 and 8-19 are allowed.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably

accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
